OUR ONGOING MISSION AT NANO COVE

Our mission is to maximize the potential of the hemp plant while empowering our customers with the best products and services to grow their businesses.

We believe that nutritional supplements and hemp derived ingredients can help almost anyone perform and live better. Nano Cove is dedicated to manufacturing the best in class supplements and efficacious ingredients backed by peer reviewed clinical research.

The Nano Cove's hemp supply chain is focused on sheer quality. Every aspect of the process from the seed genetics, farm soils, harvesting practices, extraction, distillation, formulation, manufacturing, packaging, and distribution... were carefully qualified to be the best in class. Third party testing with independent labs validates the legality and quality of our claims. We are constantly working with numerous agencies to over comply with regulations in our on-going quest to consistently deliver only the highest quality certified and premium products.

FDA AND LEGAL DISCLOSURE:

These statements have not been evaluated by the FDA and are not intended to diagnose, treat, cure or prevent any disease. Even though our products contain less than 0.3% THC by dry weight (Federal Legal Limit), studies have shown that ingesting Full Spectrum CBD can cause confirmed positive results when screening urine and blood specimens. Before taking CBD products, it's important that individuals consult with your healthcare practitioner. You must be at least 18 years or older to purchase products from this catalog.

Cannabinoids are naturally-occurring constituents of the industrial hemp plant. Nano Cove does not sell or distribute any products that are in violation of the United States Controlled Substances Act (US.CSA)

HEMP SUPPLY CHAIN MASTERY

INNOVATION • TECHNOLOGY • SERVICE

Selecting the right manufacturer for your products is one of the most important decisions you will ever make for your business. Consistency, quality, and reliability are what your customers deserve. Since its inception, Nano Cove was created with its foundational principles and ethics dedicated to upholding the highest standards for manufacturing. All our suppliers, farmers, extractors, co-packers and partners were thoroughly qualified and are now tightly held long term relationships that all share our values. The hemp supply chain has many unique facets that require expert knowledge. Only the most dedicated professionals are invited to be part of Nano Cove in serving our customers. Like any other technical supply chain, the hemp supply chain is only as strong as its weakest link. Nano Cove has carefully insulated every side of its supply chain links, ensuring smooth and efficient product flow from seed clear through to the final sale of products.

The hemp industry as we know it today is only a few years old. It is rapidly changing industry, expanding at unprecedented rates with cutting-edge technology and genius innovations. The amazing natural medicinal health and wellness gifts that come from the hemp plant are only now just being discovered. Globally, the scientific community has embraced hemp for materials, fuel, and wellness. With our team's long standing professional history in the wellness industry, we have been able to leverage our experience and relationships to combine the incredible benefits derived from hemp with countless other valuable innovations, to improve human beings overall wellbeing. Cannabinoids are being researched at an unprecedented rate with major breakthroughs being published on a regular basis. Nano Cove is additionally dedicated to driving this research and discovering the synergistic combinations that will best optimize humans individual performance.

TRACK & TRACE FROM SEED TO SALE

VERTICALLY CONNECTED PARTNERSHIPS FOR SEAMLESS MANUFACTURING AND DEPLOYMENT

CBC ISOLATE - 98%+

Cannabichromene (CBC) is a difficult cannabinoid to isolate. It is found in hemp but most strains do not contain high percentages of CBC. Our labs have discovered and perfected the most efficient ways to produce this elusive cannabinoid. Through Nano Cove, you can purchase CBC as an ingredient in products we manufacture for you or buy it in bulk. CBC can also be created into nano emulsified water miscible powder or liquid concentrate. Bulk CBC is in a thick liquid form and has a light honey color. Unlike some other cannabinoids that crystallize in high percentages, CBC remains liquid.

CBN ISOLATE POWDER

CBN (Cannabinol) is a non-intoxicating, non-psychoactive cannabinoid that has been researched for over 100 years. When THC ages and oxidizes, it is converted to CBN. When analyzing old THC cannabis flower you will see spikes in the CBN content. Studies have shown CBN to be antibacterial. Studies have also shown CBN to stimulate appetite.

Nano Cove has proprietary processes and technologies to create CBN by converting CBD. CBN typically comes from plants high in THC and is a byproduct of degrading THC. CBN has been banned in some countries because of its close chemical relationship to THC. Some lawmakers think that if CBN is present, high THC growing must have been the source. However that is not the case with Nano Cove's CBN. Our product is 100% hemp derived and created from CBD. This scientific breakthrough has made this highly effective cannabinoid available at affordable prices for the first time.

CANNABINOID ISOLATES

CBG ISOLATE POWDER

CBG stands for cannabigerol. The uniqueness of this cannabinoid is that it works with our body's endocannabinoid system unlike anything else. Studies have shown that CBG interacts with both the CB1 and CB2 receptors. CBG's popularity is rapidly growing from the massive amounts of scientific research on this cannabinoid. Furthermore, high CBG hemp is being sold at a much higher rate than ever before.

Breakthroughs in high producing CBG hemp genetics have attracted farmers because these genetics have extremely low THC and a faster maturity cycle. CBG is the precursor to CBD in the hemp plant. If a farmer was to have their CBG crop in the field for too long the CBG would mature into CBD. CBG and CBD are extracted in the exact same ways. So much of the extraction technology and infrastructure is already equipped to make CBG isolate. The prices of CBG have dropped dramatically starting in 2020 and this effective cannabinoid will be in great demand by savvy customers.

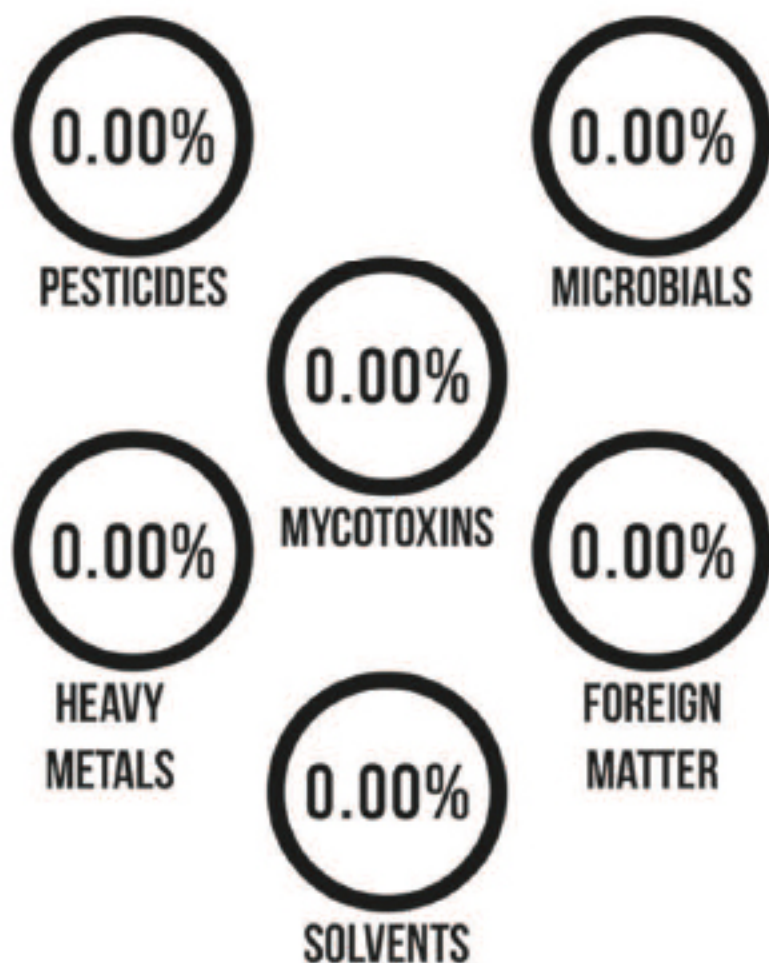

NANOCOVE

99.5%+ PURE CBD ISOLATE

Nano Cove CBD Isolate is pure cannabidiol in crystalline powder form. Isolate is great to work with and virtually a universal ingredient. Isolate can be used in topicals, edibles, vapes and can even be converted to other cannabinoids. Nano Cove's CBD Isolate is a cost effective all natural product grown in the U.S.A. and extracted in Colorado in an ISO certified super lab.

INDUSTRY LEADING STANDARDS FOR PURITY

100% THC FREE	NO RESIDUAL SOLVENTS
100% ODOR FREE	NO HEAVY METALS
PURE WHITE	NO PESTICIDES
NOTHING SYNTHETIC	NON-GMO

THC FREE DISTILLATE

Nano Cove THC-free distillate is a broad-spectrum distillate that contains 0.000% THC. Creating a true 0.000% THC broad spectrum is only possible with Nano Cove's proprietary THC remediation process. Centrifugal partition chromatographic instruments are used to remove the THC as well as any other unwanted materials. After the THC is removed, the cannabinoid content is above 85% and contains CBD, CBG, CBN and terpenes. Some international markets and big box retailers will not take products with even trace amounts of THC. We are proud to offer a broad spectrum product that complies with even the most rigorous THC requirements.

0.000% THC

Through extensive lab testing we are confident in reporting ZERO THC. We have sought out testing laboratories that validate to the thousandths of a percent (3 zeros to the right of the decimal).

Content

**8
THC**

One of the most exciting cannabinoids to hit the market in 2020 is Delta 8 THC. Products made with the cannabinoid Delta-8 THC are becoming available to consumers around the world.

Like its sibling molecule Delta-9 THC, which is largely responsible for the classic marijuana high associated with the plant, Delta-8 THC does have some psychoactive effects, but the effects are different from the experience of Delta-9 THC.

Delta-8 THC has been researched since the 1960s, and several studies have shown the cannabinoid to have several therapeutic benefits, including antiemetic (anti-nausea), anxiolytic (anti-anxiety), appetite stimulating, analgesic, and neuroprotective effects. These statements have not been evaluated by medical professionals and Delta-8 THC should not be used to treat, cure or mitigate any disease.

High Potency Delta 8 THC 85%–99%
Compliant Levels of Delta 9 THC = Below 0.3%

Delta-8 THC creates more of an in-your-body sensation and physical relaxation. Many users claim Delta-8 THC has less psychoactivity than Delta-9 THC.

"D8 produces a clear high without the anxiety often associated with D9. It can help people feel more in tune with themselves, more present in the mind, and it heightens the senses."

– HIGHTIMES MAGAZINE –

"D8" POPULAR USES

Edibles • Drinks • Vapes • Concentrates • Smokeables • and More!

WATER SOLUBLE Nano-CBD Solution

FULL SPECTRUM, BROAD SPECTRUM & ISOLATE SOLUTIONS

At 20% cannabinoid content, our water miscible solution evenly blends into water with little to no taste. The solution can be mixed into functional beverages without a dramatic impact to the flavor or texture of the drink.

Our process of nano-emulsification increases the bioavailability of the cannabinoids. Through increased absorption into the body the benefits of the CBD are more impactful. Nano Technology enables substances to exist in their smallest particle form improving solubility. The nano sized particles nourish the body in the most effective way. The effects of the nano particles are 10 times more powerful than the traditional particle size.

50 to 100 nm (nanometers)

This is the optimal size for absorbing nano particles into the bloodstream.

Stability Testing

The CBD remains stable for up to 18 months and does not settle once mixed into liquid.

Maximum Formulation Potential

Water miscible CBD gives you the greatest ability to formulate, allowing you to use the widest range of ingredients in your products.

ALL PRODUCTS COME WITH CERTIFICATES OF ANALYSIS

Rigorous 3rd party testing is a big part of the hemp supply chain. In the process of creating a finished branded product there are multiple tests performed. At each phase of the product manufacturing process, 3rd party testing must take place.

Testing is required by law but that's not the only reason so many lab tests are needed. Getting accurate amounts of active ingredients is essential for the effectiveness of the finished products. It is also important to test to ensure that unwanted elements are not present in the ingredients.

At Nano Cove, we supply as many records and tests as possible to show the chain of custody of the materials. Seed to sale traceability is required for export and import in many countries around the world. Furthermore, certain states with medical and recreational cannabis programs will not allow CBD products to be sold in dispensaries unless they have complete testing and supply chain records.

EXAMPLE COA ONLY. INDIVIDUAL COA'S MAY VARY.

PREMIUM HIGH CBD **SMOKEABLE FLOWER**

TOP FLOWER BUDS

Cultivated to contain high amounts of cannabinoids. The CBD levels are some of the highest to be bred into hemp. The superior genetics create great flavor, potent levels of cannabinoids, and below legal THC limits.

PRE-ROLLS

The 1 Gram of high CBD flower in these hand-crafted pre-rolls is rich in flavor. Only the highest quality hemp is selected for this premium product. All of the hemp is tested for potency and legality. Less than 0.3% THC is in the product.

HEMP CIGARETTES

An affordable way to get a smokable serving of CBD in each pack. A CBD cigarette is a cigarette made with hemp instead of tobacco, containing cannabidiol (CBD)

Certified organic, 100% THC compliant hemp top flower. Naturally rich in phytocannabinoids, with exceptionally high levels of cannabidiol (CBD), our High CBD Hemp Flower are unique strains grown on registered industrial organic hemp farms. Flowering female buds, bursting with beneficial terpenes and cannabinoids, are delicately hand trimmed and masterfully dried naturally, mimicking nature's perfection.

Superior quality control standards assure our industrial hemp contains zero pesticides or heavy metals and from seed to flower, is grown in full organic compliance so you receive the purest premium top flower possible.

FORMULAS
CBG, CBN, CBC**

AVAILABLE CANNABINOID POTENCIES: 500 MG, 1000 MG, OR 1500 MG

Our THC-free Tincture products are created using our broad spectrum hemp oil and diluted with hemp seed oil, grape seed oil, or medium chain triglycerides and can be custom designed with any of our Cannabinoid Distillates. These products are designed for sublingual application. Our tinctures can also be formulated with specific isolated terpenes, terpene blends, as well as our water-soluble liquid.

Custom Formulas can include a wide range of terpenes, cannabinoids and flavors. Our scientifically mastered formulas can be tailored to target categories like; pain, energy, wellness, mental alertness, immune and more.

Customizations can go beyond just the contents of the bottle. The packaging, display, graphics and more can be modified to fit your market. Contact your Nano Cove agent to set an appointment for product development.

Nano Cove tinctures are made with a proprietary Nano Technology. Our cannabinoid delivery method dramatically increases the bioavailability of the cannabinoids and other ingredients. The increased absorption into the body can increase the effectiveness and speed of the active ingredients.

CBD PILLS+

SIMPLE • CONVENIENT • EFFECTIVE

MOST CONVENIENT WAY FOR THAT DAILY DOSE

CBD in pill forms are generally much easier to use than other CBD products, as you can just pop them in your mouth, swallow, and continue with your day. They are perfect for when you are on the go, essentially flavorless, and each of these pill types has been perfectly balanced to give you the correct amount as listed on the label.

MAXIMUM BIOAVAILABILITY FROM A PILL

When swallowing pills you must consider how the nutrients are dissolved and absorbed in the stomach and intestinal linings. Many nutrients are destroyed in the stomach's acids. The nano technology that can be used in our products increases the bioavailability and absorption of nutrients into one's body.

AVAILABLE IN A VARIETY OF PILL FORMS

- CBD Softgels
- CBD Capsules
- CBD Tablets
- CBD Pressed Pills
- CBG/CBN Gelcaps
- Up to 40MG per pill

 **NANOCOVE**

NANOCOVE

Functional CBD SKIN Care Line

Introducing our proprietary ingredient enhancement technology: Nano Emulsified Sugar Encapsulated Cannabinoids. The nano technology makes the particles easily absorbed through the skin. By using sugar instead of oil to encapsulate the nano particles, the formulas effectiveness is increased making for an exceptional skin care product.

Custom formulations can be developed with a wide range of ingredients. Research and development teams can blend ingredients with CBD to create synergistic combinations. Having unique products is important in the highly competitive skin care industry.

CBD INFUSED ALOE

ALOE VERA SUPERFOOD SUPPLEMENT
DRINK & ENERGY SHOT

Real Aloe contains over 150 nutrients in a whole food form in trace amounts (parts per million or parts per billion). This is one of the very few aloe vera juices available today that is entirely made in the USA. Organically grown in southern California.

The aloe vera in our premium CBD infused drink & shot has never been frozen, freeze-dried or reconstituted from a powder. We believe in the original method of "hand filleting" the leaves, allowing them to maintain the maximum biological activity and effectiveness from the aloe leaf.

- Flavorless

Simply add to your pets food or water.
300mg per 30ml bottle.

NANOCOVE 

NANOCOVE

100% LEAD FREE VAPE CARTS

Currently, the prefilled vape cartridge segment accounts for nearly 60 percent of all concentrate sales – and that percentage is expected to increase as vaping becomes even more ubiquitous in the United States. Research suggests that there are many reasons consumers are opting for vaporization over smoking hemp top flower. Among the leading factors:

- Discretion: Vaping allows for inhalation without the distinctive hemp odor.
- Ease of use: Vape pens require little to no preparation.
- Portability: Vape pens allow for convenient use away from the home.
- Health: Vaporization in moderation has been found to be better for your body than smoking combustible hemp plant matter.

INCLUDED COMPONENTS

- Oil Inlet Pipe
- Screw Thread
- Tip
- Tip Base
- Ceramic Heating Element
- Wire Leads to Heating Element
- Cotton Filter
- Oil Tank

CURRENT STATE STANDARDS ALLOW FOR A SMALL PRESENCE OF LEAD IN PASSING HEAVY METALS TESTS. OFFER A VAPE CARTRIDGE THAT'S EVEN BETTER... ONES THAT ARE COMPLETELY LEAD FREE.

■ NANO COVE'S LEAD FREE VAPE CARTS

THE SEARCH FOR A LEAD-FREE SOLUTION IS OVER.

A lead-free vape cartridge built on a proven design with millions sold, supporting high terpene oil content. These are state-of-the-art, non-corrosive, high terpene vape cartridges that contain no detectable levels of lead in metal components nor in our hemp oil.

INDEPENDENT TESTS VALIDATE THESE CARTRIDGES ARE LEAD-FREE!

Our selected Lead-Free Vape Carts are a safer solution for your customers. These Vape Carts were submitted to independent research labs which conclusively proved there were no detectable levels of lead in any of the components nor any present in the hemp oil we used inside the cartridges. *(The current market-leading vape cartridge cannot make the same claim.)*

Our cartridges are a high-terpene vape cart engineered to deliver the most flavorful and optimum vapor for assorted viscosity standards across all terpene concentrate types and essential oils while not jeopardizing what matters most - the end user experience. These cartridges are based on a design proven able to support high-terpene hemp oil content without leaking; its wickless ceramic coil technology and atomizer gives your customers and incomparable user experience.

■ ELEVATE YOUR BRAND WITH CUSTOMIZED FEATURES & OPTIONS

The Vape Cartridges are 510 thread compatible with a screw on mouthpiece and features options that can both elevate and reflect your brand, including:

- Device is free of detectable lead, arsenic, mercury, and cadmium.
- Meets all states requirements for heavy metals.
- Performs well with all oil viscosity.
- Custom intake hole sizing available.
- Brand pantone matching for plastic tips.
- Custom wood and ceramic tips available.
- Full logo printing available on tank of cartridge.

Made with state-of-the-art food and medical-grade materials, it's the cleanest product you can put into the hands of your customers.

CUSTOM DESIGNED

Nano Cove can help you with beautiful compliant packaging that will be sure to catch your customers attention. Our team of hardware and packaging specialists will help you step by step in selecting the right options for your brand. Services are offered on an hourly or flat rate basis.

Nano Cove is also a Co-Packer for your brand. Not only can we supply you with premium distillate, custom designs and unique formulas we will also assemble your product. Our white glove turn key design and launch program is ready to assist your brand today.

BRANDED PACKAGING

VAPES

Vaping CBD involves breathing it directly into the lungs. Our CBD vape contains high-quality broad spectrum hemp oil that is rich in phytocannabinoids. It's very fast-acting, giving consumers immediate access to all of the beneficial effects of cannabinoids.

Our vape technology is focused on safety and consistency. The rapidly evolving vape industry is a relatively new industry filled with exciting innovations. One of the most effective ways to get ingredients into your body is through vaping. That is why safety is our primary focus. All of our materials are rigorously tested and our hardware manufacturing partners are 3rd party tested to be compliant in all 50 states.

Nano Cove strives to be on the cutting edge of extraction technology. Our extraction practices are designed to keep as much of the hemp plants beneficial material into the distillate. Our proprietary methods gently protect the hemp plants nutrients while removing all of the unwanted material. Our distillate is know for having the broadest spectrum of ingredients that increase the potency and effectiveness.

DISTILLATE

Distillate options:

- Full Spectrum
- Broad Spectrum with ZERO THC
- Free Flow Crystal Free
- Terpene infused

The most important aspect of your vape line will be the terpenes. Terpenes are what activate the cannabinoids and give your customers the experience they desire. Nano Cove offers a wide range of terpene blends that are sure to amaze your customers.

TERPENES

Terpene options:

- 100% hemp derived
- Hemp and botanical blends
- 100% botanical blends

HEMP DERIVED TERPENES

VARIETY IS THE
SPICE OF LIFE

WHY TERPENES ARE IMPORTANT?

- Terpenes give hemp and vape oil its natural flavor.
- Terpenes have their own medical benefits and work together with other compounds in the human endocannabinoid system (ECS).

BENEFITS OF TERPENES

- | | |
|----------------------|---------------------|
| • Anti-oxidant | • Improves focus |
| • Anti-anxiety | • Improves memory |
| • Anti-inflammatory | • Immunosuppressant |
| • Anti-depressant | • Muscle relaxant |

FOOD GRADE

**ALL NATURAL
ORGANIC**

WHY 100% HEMP DERIVED TERPENES ARE THE BEST?

- **CONTAINS 0.00% THC** - Our hemp terpenes are naturally low in THC content with a broad spectrum of great tasting and smelling terpenes.
- **AFFORDABLE** - Our farmers are growing 10's of 1000's of acres of hemp organically, and extracting via state of the art large scale industrial equipment.
- **SAFE AND EFFECTIVE** - Unlike other diluents that are not derived from hemp, terpenes can stabilize and improve the effectiveness of cannabinoids. With hemp terpenes, research shows a synergistic benefit to cannabinoids including: CBD, CBG, CBN & THC.

HEMP BIOMASS & SEEDS

With over a dozen proven genetics available you will be able to select the best hemp for your climate and growing conditions. Having high percentages of CBD is important but not as important as a well rounded genetic profile. New research in the Hemp field has proven that a broad range of elements in the plant is medically more effective. This is known as the "entourage effect". This holistic viewpoint suggests that the collective parts of the hemp plant work better than the individual constituents alone. Our genetics have been selected for the complete profile of all the elements of the plant including terpenes, flavonoids, phyto-chemicals and cannabinoids.

**Feminized - High CBD
Low THC Genetics**

When buying biomass for extraction there is an infinite number of variables one needs to consider. The quality of the seeds, soil, fertilizer and environmental conditions are paramount. Furthermore, the absence of pesticides, heavy metals, microbials and mycotoxins are essential to quality biomass. GroCove: the farming division of Nano Cove, can handle your biomass requirements.

With over 50 direct farm relationships, we work with our farming network to select the highest quality hemp that is cultivated organically. How the hemp is harvested, cured and processed, directly affects the percentages of the cannabinoids in the biomass. Removing the sticks and stems of the plant is very important for efficient extraction. Many farmers are not equipped to dry and process their hemp for extraction.

We focus on farms that have the drying and processing infrastructure that make for the best biomass. Let Nano Cove navigate the diverse characteristics of your biomass needs.
